Question 1

E a = 6 b = a c = 14 flag is 1

1.) c == a+b || !flag all the expression will be evaluated

2) a! = 7 && flag || c >= 6
this part will not be evaluated because a! = 7 is true and flag is true.

3) !(b <= 12) && a % 2 == 0
!(a <= 12) && 6 % 2 == 0
this part will not be evaluated because first part is ~~true~~ false.

4) !(a > 5 || c < a+b)
!(6 > 5 || 14 < 6+9)
this part will not be evaluated because first part is true
